

PRESENTS

Forensic Pathology for Investigators

Public Agency Training Council

DATE:

[July 28-29, 2016](#)

Description:

Effective investigation of events involving injury or death requires recognition of patterns of physical findings on the body and at the scene. Such recognition is necessary to properly interpret the significance of the finding, and integrate this information into the case as a whole. Early recognition of certain patterns of injury on the human body allows the criminal investigator to properly assess the scene and begin proper procedure for collection of relevant evidence.

This course consists of the visual presentation of hundreds of cases of injury and death, including homicides, suicides, accidents, and deaths from natural disease. Many cases of nonfatal injury are also presented, including accidental and inflicted injury in children and adults.

Other areas covered include:

- Introduction to Forensic Pathology including medical terminology
- Cause, mechanism and manner of death
- Common patterns and causes of sudden, natural death
- Categories of injuries
- Entrance v. Exit wounds
- Other types of Injury and Death to include:
Asphyxia, drug related death, fire related death, electrocution, drowning, motor vehicle collisions
- Pediatric case discussion

At the conclusion of the course, the investigator will possess a good visual library of common pattern injuries that will facilitate recognition of these patterns and their significance early in the investigative process. The investigator will recognize subtle trace evidence, and know proper collection and preservation thereof. The investigator will be able to maximize investigative effectiveness by recognizing the significance of physical findings on bodies and at scenes. The investigator will be able to integrate this knowledge base into the facts of a specific case to draw sound and defensible forensic conclusions. We see what we look for, and we look for what we know.

COURSE LENGTH:

[0800-1630](#)

Who Should Attend?

Any Officer/Detective responsible for investigations

Cost:

\$295.00 which includes a course manual, Certificate of Completion and refreshments.

Location:

Ada County Sheriff's Office , Training Annex, Classroom A, Entrance 3, 7180 Barrister Drive, Boise, ID 83704
