All Oleoresin Capsicum (OC) instructors are exposed to OC as a requirement for course completion. Students who have undergone any type of eye surgery in the past 12 months must notify the Safariland Training Group prior to enrollment in an OC course. Typically, patients who have undergone eye surgery require approximately six months for complete recovery. In order to provide the greatest safety margin, Defense Technology has therefore concluded that any student who has undergone eye surgery is STRONGLY advised to delay participation in this class for a full calendar year from the date of surgery or seek approval from a doctor or optometrist.
